

# Figure 5

Surface water samples were collected on May 5, 2020.

Sample Locations:

- 1) WGL
- 2) 9360 Basin
- 3) 9700 Weir
- 4) WGU

Refer to Map G-3, Appendix 4 for sample locations.

Windy Gulch is an ephemeral stream and typically only flows in the spring (April/May) in years when there is enough snowpack to create runoff. Windy gulch had sufficient flow for surface water sampling this spring due to a normal snowpack.
