Re: Ragsdale Reservoirs, Permit M-2020-007, Technical Revision Approval, Revision TR01

Ms. Shults:

On October 23, 2020 the Division of Reclamation, Mining and Safety approved the Technical Revision application submitted to the Division on September 15, 2020, addressing the following:

Revision TR01 was submitted to address a permit approval stipulation requiring site specific data for the geotechnical stability exhibit provided in the application to mine within 200' of any structure. TR01 was reviewed upon permit issuance and was determined by DRMS engineering staff to have met the stipulation requirements, therefore the stipulation is now considered satisfied. Structure setbacks as proposed in the permit submittal are now approved and in effect.

The terms of the Technical Revision TR01 approved by the Division are hereby incorporated into Permit M2020-007. All other conditions and requirements of Permit M2020-007 remain in full force and effect.

If you have any questions, please contact me.

Sincerely,

Eric C. Scott
Environmental Protection Specialist
