RE: Cresson Project; M1980-244, Third Quarter 2020 Groundwater and Surface Water Monitoring Report – Review Memo

On October 21, 2020, the Division of Reclamation Mining and Safety received via email the Third Quarter 2020 Groundwater and Surface Water Monitoring Report. I reviewed the report for consistency to ensure that all constituents were being reported accurately. Below is a summary of my review.

1. A standard exceedance for beryllium in SGMW-6B was not reported. During review of the 2nd Quarter 2020 report a similar exceedance in the same well was also missed and was brought to the attention of the operator.
2. A standard exceedance for sulfate in CRMW-3B was not reported.
3. During review it was noted the fluoride concentration in GVMW-8A is equal to the NPL/TVS value of 2 mg/L and was not reported or commented on.

This concludes my review of the Third Quarter 2020 Groundwater and Surface Water Monitoring Report.

If you need additional information or have any questions, please contact me at Division of Reclamation, Mining and Safety, 1313 Sherman Street, Room 215, Denver, CO 80203, by telephone at 303-866-3567 x8114, or by email at patrick.lennberg@state.co.us.

Sincerely,

Patrick Lennberg
Environmental Protection Specialist
