Mr. Cunningham,

Attached are pictures of the Corrective actions on the two pits, Hoffman (M2005-044) and Broken Spear (M2000-050), that were found as deficiencies in the last inspection. The Broken Spear picture shows the correction of building a berm to let the natural waterway continue you flow without entering the disturbed pit area. The Hoffman pit correction was to redistribute the topsoil pile to prevent erosion.

I am currently working on the correction of the pit boundaries for the Broken Spear pit. I have mapped an area that will include 9.9 acres as is written.

Fred Lundy
