Dear Mr. Parkerson:

On October 15, 2020 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Revegetation was cited as a problem for excessive noxious weeds. Corrective actions required you to submit a noxious weed management plan by the corrective action date.

On November 24, 2020 the Division approved TR-1 which included a noxious weed management plan. This satisfies the corrective action and it is considered abated.
