Inspection Topic Summary

NOTE: Y=Inspected N=Not Inspected R=Comments Noted V=Violation Issued NA=Not Applicable

Y - Air Resource Protection NA - Roads

NA - Backfill & Grading R - Revegetation

NA - Excess Spoil and Dev. Waste
 NA - Subsidence
 NA - Explosives
 Y - Slides and Other Damage

R - Fish & Wildlife
R - Hydrologic Balance
R - Signs and Other Damage
R - Support Facilities On-site
R - Signs and Markers

R - Gen. Compliance With Mine Plan
 N - Other
 NA - Support Facilities Not On-site
 Y - Special Categories Of Mining

NA - Processing Waste NA - Topsoil

COMMENTS

A complete inspection was conducted by Rob Zuber of DRMS. No Coors Energy Company (CEC) representatives participated in the inspection. The site is in Permanent Cessation. Reclamation activities (including seeding) were completed in the fall of 2020.

The weather was clear and warm for November. The ground was dry.

AVAILABILITY OF RECORDS – Rule 5.02.4(1):

The records were generally in good shape (see list at the end of this report), but some items were missing, most notably the current insurance document. Also, the recent weed and pest reports were not located.

FISH and WILDLIFE – Rule 4.18:

As usual, many birds were seen and heard at the ponds.

HYDROLOGIC BALANCE - Rule 4.05

Drainage Control 4.05.1, 4.05.2, 4.05.3; Siltation Structures 4.05.5, 4.05.6; Discharge Structures 4.05.7, 4.05.10; Diversions 4.05.4; Effluent Limits 4.05.2; Ground Water Monitoring 4.05.13; Surface Water Monitoring 4.05.13; Drainage – Acid and Toxic Materials 4.05.8; Impoundments 4.05.6, 4.05.9; Stream Buffer Zones 4.05.18:

Sediment Pond 2 appeared to be empty (cattails may have concealed a small amount). A small amount of water was seen in the Dugout Pond. Neither pond was discharging during the inspection. There were no signs that they had discharged recently. As usual, they both contained large amounts of riparian vegetation. No problems were observed with the two ponds except for two holes in the embankment at Sediment Pond 2 (each approximately 10 inches deep). These should be filled.

GENERAL MINE PLAN COMPLIANCE:

The eastern portion of the northern boundary of the site (including the ditch to Sediment Pond 2) was observed, and no signs of pollutant loading from the mine site, or any other problems, were seen. The western boundary was also observed from the southern end of the reclaimed B Pit; no issues were identified.

RECLAMATION SUCCESS - Rule 4.15, Rule 3:

Most of the site was walked (all except northwest corner and southwest corner), and no erosion problems were seen. This includes the relatively steep slope between the Dugout Pond and the area where topsand was stored (south of facilities).

REVEGETATION - Rule 4.15

Vegetative Cover; Timing:

Recently seeded areas (roads, soil storage areas, the Long Term Spoil Area, and B Pit) do not have good vegetation cover. In general, the areas that were seeded prior to 2019 have good cover.

SUPPORT FACILITIES - Rule 4.04:

No problems were seen at the facilities area.

SIGNS AND MARKERS – Rule 4.02:

The entrance sign was in place but needs to be updated to reflect the new status (include contact information for DRMS).

DOCUMENTS RECEIVED - none

OTHER (SPECIFY) - none

ENFORCEMENT ACTIONS/COMPLIANCE

No enforcement actions were initiated as a result of this inspection, nor are any pending.
