| MINE NAME: Hinds Pit #35 | MINE/PROSPECTING ID#: M-2003-070 | MINERAL: Sand and gravel | COUNTY: Baca |
| INSPECTION TYPE: Monitoring | INSPECTOR(S): Daniel Cunningham | INSP. DATE: November 2, 2020 | INSP. TIME: 15:30 |
| OPERATOR: Baca County | OPERATOR REPRESENTATIVE: Shiloh Freed | TYPE OF OPERATION: 112c - Construction Regular Operation | |

| | | |
|---|---|--|
| REASON FOR INSPECTION: Normal I&E Program | BOND CALCULATION TYPE: None | BOND AMOUNT: \$0.00 |
| DATE OF COMPLAINT: NA | POST INSP. CONTACTS: None | JOINT INSP. AGENCY: None |
| WEATHER: Clear | INSPECTOR'S SIGNATURE:  | SIGNATURE DATE: December 4, 2020 |

GENERAL INSPECTION TOPICS

This list identifies the environmental and permit parameters inspected and gives a categorical evaluation of each. No problems or possible violations were noted during the inspection. The mine operation was found to be in full compliance with Mineral Rules and Regulations of the Colorado Mined Land Reclamation Board for the Extraction of Construction Materials and/or for Hard Rock, Metal and Designated Mining Operations. Any person engaged in any mining operation shall notify the office of any failure or imminent failure, as soon as reasonably practicable after such person has knowledge of such condition or of any impoundment, embankment, or slope that poses a reasonable potential for danger to any persons or property or to the environment; or any environmental protection facility designed to contain or control chemicals or waste which are acid or toxic-forming, as identified in the permit.

OBSERVATIONS

This was a routine monitoring inspection conducted at the Hinds Pit #35 by DRMS representative DJ Cunningham. A representative of Baca County was present during the inspection representing the Operator. This site is an active, 20 acre, 112c permit, where approximately 15 acres has been disturbed to date. The site was not active at the time of the inspection.

The site identification sign was posted at the mine entrance and the boundary was marked. Several large stockpiles were seen throughout the site. Topsoil was being stored around the perimeter of the disturbed area. Slopes were graded at a 3H:1V or greater.

The previously noted standing water in the pit floor is no longer present.

No major issues were noted during the inspection.
