Re: Baseline Resource – M1997058
Inspection date: 11/16/2020

Dear Eric:

Attached are photographs taken on December 16, 2020 to show the completed remedial action for the inspection problems noted in your report dated November 18, 2020 for the following issues:

1. Erosion gullies and ruts – Nine (9) photographs labeled “Walker grading” show the regraded slopes of the reservoirs to eliminate the gullies and ruts.
2. Permit markers –The corrected northern boundary markers have been placed and labeled.
3. Reclamation Success – As noted in the inspection report, A technical revision will be submitted on or before 02/28/2021

Please confirm that the issues noted in your inspection report have been satisfactorily remedied for this mine site based on the enclosed information.

Sincerely,

Ed Lafferty
Vice President Construction
