RE: **M2012-0004**
Remediation of Disturbed Area
North Star Gravel Pit
Hereford, CO 80732

Dear Madam/Sir:

During the Topographic survey that was completed on February 8, 2020. While drafting the survey data, a disturbed area outside of the Mining Permit Area was noted. No removal of minerals was performed in this area as observed in the Topographic information. Overburden from the grubbing operations of the gravel pit area, may have been mistakenly stored in this area, however the area had been reclaimed for dryland corn production at the time of the field survey.

If you have any questions, please contact me.
Respectfully submitted.

Mark Taylor
