RE: Liberty Mine, Permit No. M-2013-070, Inspection Problem Abated

Dear Mrs. Bonde

On October 20, 2020 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Signs and markers was cited as a problem for missing a mine sign. Corrective actions required you submit photo documentation that a new sign had been posted by the corrective action date. On December 23, 2020 the Division received photos of the corrected mine sign. This satisfies the corrective action and it is considered abated.

Please be aware that the corrective action regarding noxious weed management still remains unresolved. If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist
