**RE: Gold Hill Mill Permit No. M-1994-117: Weed Control Management Plan Report**

Amy Eschberger:

Attached to this letter is a copy of a map of the Gold Hill Millsite, showing all of the areas within and near the permit boundaries that were sprayed for weeds during the past year. On May 4, 2020, a CMC employee spent a total of 8 man hours spraying for weeds at the Gold Hill Millsite. The area around the tailings impoundment dam and the property South and West of the mill building were sprayed with 10 gallons of herbicides. Roundup and Curtail are the brand names of the two herbicides sprayed on the weed infestations. Canadian thistle and Spotted/ Diffuse knapweed were the main weeds that were sprayed for during this time period.

Canadian thistle & Knapweed / Gold Hill Millsite / 3.5 acres of Infestation. / Spring / Summer / Spraying / High Priority.

Canadian thistle & Knapweed / Gold Hill Millsite / Thin to Moderate depending on location. / Very Vigorous in a few areas and thinner in other areas depending upon cover. / 8 Hours were spent with 1 man spraying for a total of 8 man hours.

The weed management spraying conducted in 2018 and 2019 appears to have been highly successful, and the weeds were not as thick in most areas in 2020 as in the previous years.
