Clayton,

As we discussed yesterday, Mountain Coal Company has submitted a complete technical revision application (TR-149) for the West Elk Mine, in order to abate NOV CV-2020-001.

TR-149 updates the subsidence evaluation for the mine following the unexpected subsidence of South Prong Creek.

I would like your help with the adequacy review of the material submitted. Laserfiche links are given below.

The initial adequacy due date is 1/30/2021 so I would appreciate your comments by 1/27/2021. We can meet at any point to discuss the revision and the applicable rules (I'll be in the field, so unavailable on 1/25-27).
