RE: Adequacy Review; Technical Revision (TR-03); Superior S&G Pit, Permit No. M-1979-189

Dear Mr. Green,

On December 31, 2020, the Division of Reclamation, Mining and Safety (DRMS) received a request for Technical Revision (TR-03) to update the Reclamation Plan and Map at the Superior S&G Pit, Permit No. M-1979-189. Please be advised that on February 1, 2021, the application for TR-03 may be deemed inadequate and denied unless the following adequacy items are addressed to the Division's satisfaction. Please respond to the adequacy items with a letter summarizing each response, to the numbered items below, in a cover letter titled "Preliminary Adequacy Review Response TR-03, M-1979-189".

1. Please clearly show the currently approved permit boundary on the Overall Site and Access Plan, sheet 3 of 19.
2. Pursuant to Rule 6.2.1(2) all maps need to be signed by a registered land surveyor, professional engineer, or other qualified person.
3. Please provide a brief summary of the reclamation efforts that are reflected in the plans.
4. Is there a change in the currently approved seed mix?

This concludes the Division's adequacy review of your application. The Division reserves the right to further supplement this document with additional adequacy items and/or details as necessary.

The decision date for your application is set for February 1, 2021. However, please allow the Division sufficient time to complete its review by submitting your response no later than five (5) working days prior to the decision date. If additional time is needed to respond, an extension request must be received by our Office by the decision date. If on the decision date, outstanding adequacy items remain, and no extension request has been received, your revision may be denied and the file terminated.
