Re: Minrec Inc., North Thompson Creek Mines  
MT-08 Mid Term Review  
Application for a technical revision (MR-28)  
Permit No. C-1981-025

Dear Mr. Zuber:

DMRS' midterm review MT-08 has identified the following issue:

*On Drawing D-2-5 of the PAP, the Pond P-9 spillway and the exact location of the CDPS outfall need to be clarified. The currently approved drawing does not clearly illustrate the course of flow out of Pond P-9. Also, on the drawing the outfall appears to be in the ditch to the Refuse Pond. **Please revise this drawing or provide an explanation as to why the current drawing is accurate.***

Attached drawing D-2-5 was revised as requested.

Sincerely,

*J. E. Stover*

### APPLICATION FORM FOR A REVISION TO A COAL MINING AND RECLAMATION PERMIT

This form must be completed and submitted with all requests for minor revisions, as defined in Rule 1.04(73), technical revisions, as defined in Rule 1.04(136), and permit revisions, as defined in Rule 1.04(90). All revisions are to address the requirements of Rule 2.08.4. Three (3) copies of the revision, including maps, must be submitted in order for it to be complete.

All revisions are to be formatted so they can be inserted into the permit to replace the revised sections, maps, tables and/or figures, with a revised table of contents, if necessary. The revision submittal date should be printed in the lower right corner of each revision page. A cover letter to the revision should explain the nature of the revision and reference the specific permit sections being revised.

For federal mines, a copy of the revision application must be submitted to all agencies on the federal mailing list (except OSM) at the same time the application is submitted to the Division, and proof of distribution must be submitted to the Division along with the application. Copies of revision pages modified during the review process must be distributed in the same manner, along with proof of distribution. Proof of distribution must be submitted prior to implementation of the revision.
