Tony,

Thank you for the updated document.

I was in the office yesterday and was able to locate your original document, which did include the lower portion of page 1 and had the crimped corporate seal on page 8. We have corrected this in our public file. With that information, and the completed entrance location on page 2, we can call the application complete for the purpose of filing. The wet signatures and required initials for the permittee responsibilities will still be required, but can be addressed through the upcoming adequacy review process.

We have implemented a new electronic notices process. Fremont Paving should receive electronic notification of the the amendment file being complete for the purpose of filing today or Monday.

Please contact me if you have any questions.

Tim Cazier, P.E.
