To whom it may concern,

The design for the perimeter fence at the Cripple Creek and Victor Gold Mine was based on a CDOT Wildlife Fence (Standard CDOT plan Number M-607-4). The CDOT design was used only as a guideline and ultimately upgraded based on the terrain and longevity of the materials. The fence is 8' height including Woven Wire fabric, the fence includes no more than a 6" gap in between the bottom of the fence to the ground. The CDOT detail calls for 5" diameter treated wood posts spaced at 16' on center. We upgraded the fence design to include heavy duty galvanized steel posts set at 16' On Center in lieu of the wood posts. All Terminal posts to be set in concrete footers (The only deviation from the CDOT M-607-4 fence design is the upgrade from Wood posts to Steel posts).

Based on our expertise and experience we are confident that the fence design is adequate for the terrain and purpose intended.

Respectfully,

Jeff Poulin
