**Re: Adequacy Review #2, Technical Revision TR-01
Mineral Mountain Project, Permit M-2014-045**

Mr. Barker:

The Division of Reclamation, Mining and Safety (Division) has reviewed your responses to the Division's November 13, 2020 Adequacy Review for Technical Revision TR-01 of the Mineral Mountain Project, Permit No. M-2014-045, and submits the following additional items. The decision date for TR-01 is March 16, 2021, therefore a response to the Division's Adequacy Review #2 should be submitted as soon as possible. Please respond to this follow-up adequacy item with a letter titled "Adequacy Review Response #2 TR-01; M-2014-045" summarizing the response to the numbered item below.

7. In response to Adequacy Item #1, the Operator states the drums of xanthate have already been relocated off-site and are being stored in a manner as recommended by the manufacturer. Please provide the manufacturer's recommendations for storage and describe how it is currently being stored.

This concludes the Division's Adequacy Review #2 of TR-01. Subsequent to receipt and review of the Operator's response to this item, the Division may identify additional items. As a reminder, please be advised TR-01 may be deemed inadequate, and the request may be denied on March 16, 2021, unless the above mentioned adequacy review item is addressed to the satisfaction of the Division.

If you have any questions, please contact me at 303-866-3567 ext. 8132 or elliott.russell@state.co.us.

Sincerely,

Elliott R. Russell
Environmental Protection Specialist
