Mr. Pulda,

The USFS has informed CDRMS that you have been inquiring about developing your mining claims in the Red Feather Lakes area. From the information provided to CDRMS, it has been determined that an approved mining reclamation permit is required before mining operations begin.

See the attached letter for more information.

I am available to answer you questions and guide you through the application process,

Sincerely,

Brock

Good Morning –

Your e-mail about using a mini-ex on your claim made it's way to me. Our response letter, along with some additional information, is attached. I am your local Forest Service contact for mining claims in Larimer County. If you have additional questions please let me know.

Re: RFL Rockshop; Permit No. M-2021-017; Need for State Mine Reclamation Permit

Dear Mr. Pulda,

The Colorado Division of Reclamation, Mining and Safety (Division) has specific Rules and Regulations for Hard Rock, Metal, and Designated Mining Operations, adopted by the Colorado Mined Land Reclamation Board in January 2015. These rules are in accordance with the Colorado Mined Land Reclamation Act (Title 34 Article 32). It has come to the attention of the Division that you may be conducting mineral operations at your claim that requires a mine reclamation permit. The Division has assigned permit ID number M-2021-017 to your claim. Please reference this Permit ID number on any correspondence you submit to the Division.

As defined in the Act (34-32-103(8)), “mining operation” means the development or extraction of a mineral from its natural occurrences on affected land. These activities would need an approved mine reclamation permit with the Division.

As defined in the Act (34-32-110), any person desiring to conduct limited mining operations may apply for the expedited processing of a mine reclamation permit under two categories: 110(1) – for operations on less than five acres; or 110(2) – for operations on less than ten acres. Both categories limit material extractions to less than 70,000 tons of mineral or overburden or combination of the two per calendar year.

An approved reclamation permit is required prior to conducting any mineral mining activities on your claim. If you have any questions regarding whether your activities require a reclamation permit, please contact me at (720) 774-0040 or brock.bowles@state.co.us.

Sincerely,

Brock Bowles

Forms, rules, and info on mining in Colorado. DRMS can also be reached at (303) 866-3567.

NRCS Web Soil Survey: <http://websoilsurvey.nrcs.usda.gov>

Web Soil Survey (WSS) provides soil data and information produced by the National Cooperative Soil Survey. It is operated by the USDA Natural Resources Conservation Service (NRCS) and provides access to the largest natural resource information system in the world. NRCS has soil maps and data available online for more than 95 percent of the nation's counties and anticipates having 100 percent in the near future. The site is updated and maintained online as the single authoritative source of soil survey information. Users define their area of interest, then can explore soil data, soils map, and create their own printable maps and reports directly from the online source.

(Note that much of the Mount Antero area is not included on the NRCS Soil Survey.)
