

### **TR-30 Old Barn Staging Area & Access Road**

TR-30 proposes to use an area surrounding the 'old barn', located 0.86 miles east on County Road 120 of the King II mine site driveway, as a staging area (Old Barn Staging Area) for materials and equipment to be used during a Low-Cover Crossing construction project located within OSMRE permit CO-0106C. Also, TR-30 proposes to use the existing two-track road which extends from the barn to the north boundary of Section T36N R12W, N.M.P.M (CDRMS permit boundary C-1981-035/OSMRE permit boundary CO-0106C) as an access road to the aforementioned construction project. This road is an historic access to adjacent properties and will not be reclaimed at the termination of the construction project.

Surface drainage features for the Old Barn Staging Area and two-track road segment are shown on Map King II-005.

For the Old Barn Staging Area, typical construction stormwater controls will be utilized to mitigate erosion and sedimentation. These include a vehicle tracking pad at the entrance to the staging area, silt fencing around the perimeter of the disturbed area, and berms that feed into hay bale structures.

For the access road, on steeper sections where erosion is likely, sediment control logs and/or rock check dams will be installed in the roadside ditch to mitigate erosion. A water truck will be utilized to control dust on the access road.
