

<u>Map</u>	<u>Description</u>	<u>Status</u>	<u>Acres</u>	<u>BF</u>	<u>Grade</u>	<u>Soil</u>	<u>Seed</u>	<u>Type Seed</u>	
A	Well Pad (Perm/PreEx)	Not effected land - maintenance	1.7						No change
B	West Road (Perm/PreEx)	Not effected land - maintenance	0.9						No change
C	East Road (Perm/PreEx)	Not effected land - maintenance	0.2						No change
D	Soil stockpiles	At final grade	3.1		3.1	3.1	3.1	Grazing	Increased
E	Work and traffic areas	No change in grade to date	2.0	1.0	2.0	2.0	2.0	Grazing	Increased
F	Ponds (excavations)	Active mining and processing	4.2		4.2			Semi-irr	Increased
F1	North Pond (excavations)	Filling (silt from wash plant)	0.6						No significant change
F2	South Pond (excavations)	Active mining and processing	2.4						Increased
F3	East Pond (excavation)	Past mining - clean water supply	0.8						No change
G	Unaffected "islands"	Not affected land - protect	0.8						No change
H	Areas to be sloped	Not all currently affected	2.7	2.7	2.7	2.7	2.7	Semi-irr	Increased
H1	Area to be sloped to pond	Already affected	1.5						Increased
H2	Area to be sloped to pond	Not yet affected	1.1						No change
J	Future areas (2021-2024)	To be mined	0.7	0.7	0.7	0.7	0.7	Grazing	Decreased
Summary of Areas (in acres)			12.6	4.4	12.6	8.4	8.4		

Highwalls NONE

Note: Tasks listed are based on reclamation to be done immediately with no further mining. As mining continues (2021-2024), Pond areas will be expanded, and work areas will be reduced by reclamation. Excavation and shaping of ponds done without dewatering. Pond slopes 3:1 for at least 15 feet below normal water level.
