

Parkdale Quarry Expansion Project

Exhibit H – Wildlife Resources

Wildlife resources within the current Parkdale Quarry mine permit boundary were documented in a 1997 report by Cedar Creek Associates, Inc. A subsequent wildlife resources evaluation for the area of proposed expansion on Bureau of Land Management lands north of the current permit area was completed in 2020 as part of the project Environmental Impact Statement. A copy of the Wildlife Resources Report for the current permit and the Wildlife sections from the EIS are attached.
