

Parkdale Quarry Expansion Project

Exhibit I – Soils

Soils within the current Parkdale Quarry mine permit boundary were documented in the original 1997 permit application. The soils in the expansion area were identified using the United States Department of Agriculture Natural Resource Conservation Service (USDA-NRCS) Web Soil Survey (<https://websoilsurvey.sc.egov.usda.gov/App/HomePage.htm>). A copy of the Soils Report for the current permit and the soils data from the USDA-NRCS Web Soil Survey for the expansion area are attached.
