Hi Peter,

I left you a couple messages and I hope all as is well. I don't know who makes the decisions on a complaints or who can handles resolutions. I have forwarded all information to the board and asked for guidance in filing a complaint or presenting all documentation to the board for guidance at their next available monthly meeting. We still need to have a on site inspection and need to do so very soon. We are running out of time on seeding for new grass and would like to go ahead with fixing the slope of the lake and it is extremely time sensitive. We will make any day, any time or whatever your schedule will allow.

Sincerely
Jamie Christensen

Jamie,

The Division received your complaint regarding the final release request (SL-01) for the Green Croissant Mine operated by Loveland Ready Mix. The complaint was also received by the Mined Land Reclamation Board's secretary, however since this item is not scheduled before the Board the Division will process and investigate the complaint.

An inspection will be scheduled by the Division with the Operator to investigate the complaint and to evaluate the site for the final release request in accordance with Rule 4.17.2. The Division does not have the authority to invite landowners to inspections of permitted mine sites. Please contact the Operator requesting to be present during the inspection.

Peter S. Hays

Hi Peter

I appreciate your response. Do you know when that site inspection will take place? We need to know the consequences for moving forward and fixing the slope of the lake. We are scheduled to start in one week. That is why my husband and I keep calling and leaving messages. We have a few questions that we really need answers on. Can you call Dustin or I today at your earliest convenience.

Sincerely
Jamie Christensen

Hi Peter,

We requested to be present at the meeting and LRM has denied our request. We also requested to regrade the slope also we were denied. So I guess we will wait for your report. Camille said that you can help with presenting our concerns to the board. I am assuming we are to wait for your report/recommendations after your site visit. Since we are not allowed to be there are we allowed to know when it is? So we know the time frame we are looking at for a answer to our concerns.

Sincerely
Jamie Christensen
