1313 Sherman Street, Room 215, Denver, Colorado 80203 ph(303) 866-3567

REQUEST FOR TECHNICAL REVISION (TR) COVER SHEET

File No.: M- _____ Site Name: _____

County _____ TR# _____ (DRMS Use only)

Permittee: _____

Operator (If Other than Permittee): _____

Permittee Representative: _____

Please provide a brief description of the proposed revision: _____

As defined by the Minerals Rules, a Technical Revision (TR) is: “a change in the permit or application which does not have more than a minor effect upon the approved or proposed Reclamation or Environmental Protection Plan.” The Division is charged with determining if the revision as submitted meets this definition. If the Division determines that the proposed revision is beyond the scope of a TR, the Division may require the submittal of a permit amendment to make the required or desired changes to the permit.

The request for a TR is not considered “filed for review” until the appropriate fee is received by the Division (as listed below by permit type). Please submit the appropriate fee with your request to expedite the review process. After the TR is submitted with the appropriate fee, the Division will determine if it is approvable within 30 days. If the Division requires additional information to approve a TR, you will be notified of specific deficiencies that will need to be addressed. If at the end of the 30 day review period there are still outstanding deficiencies, the Division must deny the TR unless the permittee requests additional time, in writing, to provide the required information.

There is no pre-defined format for the submittal of a TR; however, it is up to the permittee to provide sufficient information to the Division to approve the TR request, including updated mining and reclamation plan maps that accurately depict the changes proposed in the requested TR.

Required Fees for Technical Revision by Permit Type - Please mark the correct fee and submit it with your request for a Technical Revision.

<u>Permit Type</u>	<u>Required TR Fee</u>	<u>Submitted</u> (mark only one)
110c, 111, 112 construction materials, and 112 quarries	\$216	<input type="checkbox"/>
112 hard rock (not DMO)	\$175	<input type="checkbox"/>
110d, 112d(1, 2 or 3)	\$1006	<input type="checkbox"/>

RE: Technical Revision for Crader Gravel Pit M-1981-114

La Plata County is requesting a technical revision for the Crader Gravel Pit permit, see Figure 1. There are three items listed in this TR for approval that will become final reclamation on County owned property.

The County is conducting asphalt work and would like to temporarily store the asphalt at Crader pit. This asphalt would be reused on other asphalt projects.

The County would like to asphalt the storage yard for maintenance and weed control. The storage yard is fenced and is approximately 3 acres. The County would use the area not being mined at Crader Pit and has enough room for trucks to place asphalt and lay down asphalt. The work would begin on April 17th for 40 working days.

The County would like to place a sand shed for sand storage located outside of the storage yard, see figure. The sand shed would be identical to existing sand sheds located on County owned property. The sand shed design is a concrete walled structure with a material cover approximately 110 feet x 45 feet, as shown in Figure 2.

Please see attached map for additional information. We appreciate your assistance.

Thank you,
