RE: Technical Revision for Crader Gravel Pit M-1981-114, additional information

La Plata County received DRMS' letter dated May 10, 2021 Adequacy Review.

1. La Plata County is clarifying that the asphalt yard as well as associated structures shown in the map of the storage yard are considered post reclamation features that will remain on site.
2. La Plata County will be placing a permanent structure, sand storage shed, adjacent to the storage yard. The County will not reclaim this and consider it to be a permanent structure.

Thank you for your review.

Thank you,
