Good morning Mrs. Christensen,

Loveland Ready-Mix claims the survey map was generated based on survey information on 1/2/2019 from elevation point measurements. According to Mrs. Fancher-English, these point measurements were taken onsite. Attached is additional correspondence provided by LRM regarding the survey.

Hi Jared

Did you find out if the Topographical Map that LRM used was a Map on how the slope was supposed to look like or was there actual people that made a site visit and measurements in person to create map? If so who created the Topographical map used?

Sincerely

Jamie Christensen
