**RE: Liberty Mine, Permit No. M-2013-070, Inspection Problem Abated**

Dear Mrs. Bonde

On October 20, 2020 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Revegetation was cited as a problem for noxious weeds. Corrective actions required you to implement the approved noxious weed plan and submit photo documentation of treatment(s) by the corrective action date. On June 16, 2021 the Division received photos of the corrected mine sign. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

**Amy Yeldell**  
Environmental Protection Specialist
