**RE: Twentymile Coal, LLC - Foidel Creek Mine (Permit No. C-82-056), Minor Revision (MR21-318) 15-Left Thickener Underflow Borehole, Pad and Pipeline Revision**

Dear Ms. Lynch:

Twentymile Coal, LLC (TC) requests CDRMS approval of a Minor Revision to our existing approved Permit for the movement of the already permitted 15LT TUF borehole, pad and pipeline. Under TR 18-90 TC permitted 4 additional TUF borehole locations. Due to current pumping and water levels under ground TC is requesting to move the 15LT pad 1000 feet east to allow for addition capacity in the underground workings.

All original specifications permitted under TR90 for the 15 LT borehole location are still applicable. The only change is the pad location and the pipeline route which are minimal.

Detailed design and maps are provided as revised PAP exhibits and revised maps, reflecting the location and configuration of the new location.

We would like to proceed with this project ASAP to avoid any operation delays. We, therefore, appreciate your consideration, cooperation, and assistance in facilitating timely review and approval of this Minor Revision application. After you have opportunity to review the accompanying information, please feel free to contact me with any questions or to discuss submittal materials or related matters.

Sincerely,

*Miranda Kawcak*
