Stephanie,

A copy of the survey results from the Christensen's for Cell 4 of the Green Croissant site is attached. Based on a review of the results, the Division will require Loveland Ready Mix to regrade Zones 9, 20, 25, 26, and the south end of Zone 27 to comply with Rule 3.1.5(7) which requires slopes to be 3H:1V 5 feet above to 10 feet below the water line.

What is the timeline for the below water survey of Cell 4? Please let me know.

Please let me know if you have any questions.

Peter S. Hays

Peter,

Sorry for the delayed response to your question below.

Our surveyor is hoping to get the below water survey completed by end of next week.

It's a struggle finding people and equipment.

Regards,

Stephanie Fancher-English

Loveland Ready-Mix Concrete, Inc.
