Re: Gunnison River Gravel Pits, Permit No. M-2009-048, Technical Revision Approval, Revision No. TR-4

Dear Mr. Weaver:

On July 12, 2021 the Division of Reclamation, Mining and Safety approved the Technical Revision application submitted to the Division on July 7, 2021, addressing the following:

Import of vegetation, dirt, cement and asphalt. Cement and asphalt will be re-processed and potentially blended with other commodities before being exported. Dirt will be blended then exported.

Vegetation (trees) may be placed in the bottom of the pit at no more than 5 feet thick. Pulverized vegetation will be covered with min. 1 foot of dirt. Placement only on the bottom of the pond, not within the slopes. Alternatively a pile outside of the pit/pond will be covered with min 3 feet of dirt

The terms of the Technical Revision No. 4 approved by the Division are hereby incorporated into Permit No. M-2009-048. All other conditions and requirements of Permit No. M-2009-048 remain in full force and effect. The currently held bond in the amount of \$91,664.00 remains sufficient.

If you have any questions, please contact me.

Sincerely,

Amy C. Yeldell
Environmental Protection Specialist
