July 19, 2021,

Dear Patrick,

As you can see just past the crushing deck, to the north east the large mounds, still have kochia weeds you can tell by the color.

It is my understanding that all weeds on the parcel are to be controlled, not just the ones seen from the road.

Fremont has mowed what is near 36th In. Based on this picture, you can still see more from the road and who knows what can't be seen from the road.

Please see that all weeds are under control at this site.

Thank you for your time in this matter.
