**RE: Climax Molybdenum Company, Permit No. M-1977-342, Technical Revision No. 34 - Fifth Decision Date Extension Request**

Dear Mr. Hays:

Climax Molybdenum Company (CMC) submitted a request for Technical Revision (TR) No. 34 to the Henderson Reclamation Permit on March 5, 2021. Pursuant to Rule 1.9.1, the Division of Reclamation, Mining and Safety (DRMS) "shall act on a Technical Revision application within thirty (30) days after the Technical Revision has been filed with the Office". In order to provide additional time for the DRMS to review and inspect aspects of the revised Environmental Protection Plan, CMC has requested four 30-day decision date extensions, the first on March 31, the second on May 6, the third on June 2 and the fourth on July 2. CMC received the DRMS adequacy review letter on July 7, 2021 and is preparing a response. CMC would like to request a fifth, 30-day extension to allow time to complete the adequacy review response and for DRMS to review the response and approve the TR. This will change the decision date to September 1, 2021.

If you have any questions, please contact me at (720) 942-3255.

Sincerely,

A handwritten signature in blue ink that reads 'Miguel Hamarat'.
