Hukill Gulch Millsite Permit # M-2009-076 Ground Water Monitoring Plan Sample Report for test June 16, 2021

Peter Hays Colorado DRMS 1313 Sherman St., Room 215 Denver, Colorado 80203

Dear Mr. Hays,

Patrick Maher of Venture Resources Inc. tested both the up-gradient and downgradient wells at the Hukill Gulch millsite on June 16th, 2021. The results are as follows:

Up-gradient well:

- 1) Unlocked and opened the security cap.
- 2) Inserted a geotech .84x12 inch bailer-style sampler into the casing and lowered it via a clean nylon cord.
- 3) Let sampler reside on bottom for 4 minutes.
- 4) No water was collected and therefore the well was dry.

Down- gradient well:

- 1) Unlocked and opened the security cap.
- 2) Inserted a geotech .84x12 inch bailer-style sampler into the casing and lowered it via a clean nylon cord.
- 3) Let sampler reside on bottom for 4 minutes.
- 4) No water was collected and therefore the well was dry.
