**Re: Foidel Creek Mine; C-1982-056:
Technical Revision No. 97 (TR 97)
Adequacy Review**

Dear Mrs Kawcak:

The Colorado Division of Reclamation, Mining, and Safety (Division) has reviewed the above referenced revision. TR 97 was found complete on 7/7/21. Please find in the letter attached the adequacy review item that will need to be addressed prior to the Division's approval of the revision.

- 1. Please provide the Division with a proof of publication.**
- 2. The revised text submitted with TR-97, page 2.05-84.77 states the 2.1 acres for the pad and 1.6 acres for the road of disturbance will be created. The revision application submitted electronically and the cost estimate list 2.2 acres of disturbance. Please clarify the discrepancy and make updates as needed to submitted material.**
- 3. The Division was informed that Colorado Parks and Wildlife intended to provide comments on this revision. Those comments have not yet been received as of the writing of this letter. These comments may be provided as adequacy items at a later date.**

The Division's proposed decision for this revision is currently 9/5/2021. If additional time is needed to address the issue above, please request an extension of the decision date. If you have any questions feel free to contact me at 720-618-0860 or by email tabetha.lynch@state.co.us.

Sincerely,

Tabetha Lynch
