Re: Leadville Mill

Existing Permit No. M1990-057

Application for Cyanide Processing

Mr. Czapla:

I represent the Leadville Sanitation District, which owns and operates a sewage treatment facility just west of Leadville, Colorado. CJK Milling Company, LLC has submitted an application with your division for a permit to undertake cyanide processing on a tract of land immediately adjacent to the Leadville Sanitation District's sewage treatment plant. Attached you will find a plat, which identifies the district's finishing pond as well as the facilities of CJK Milling Company, LLC. It is intended for your reference.

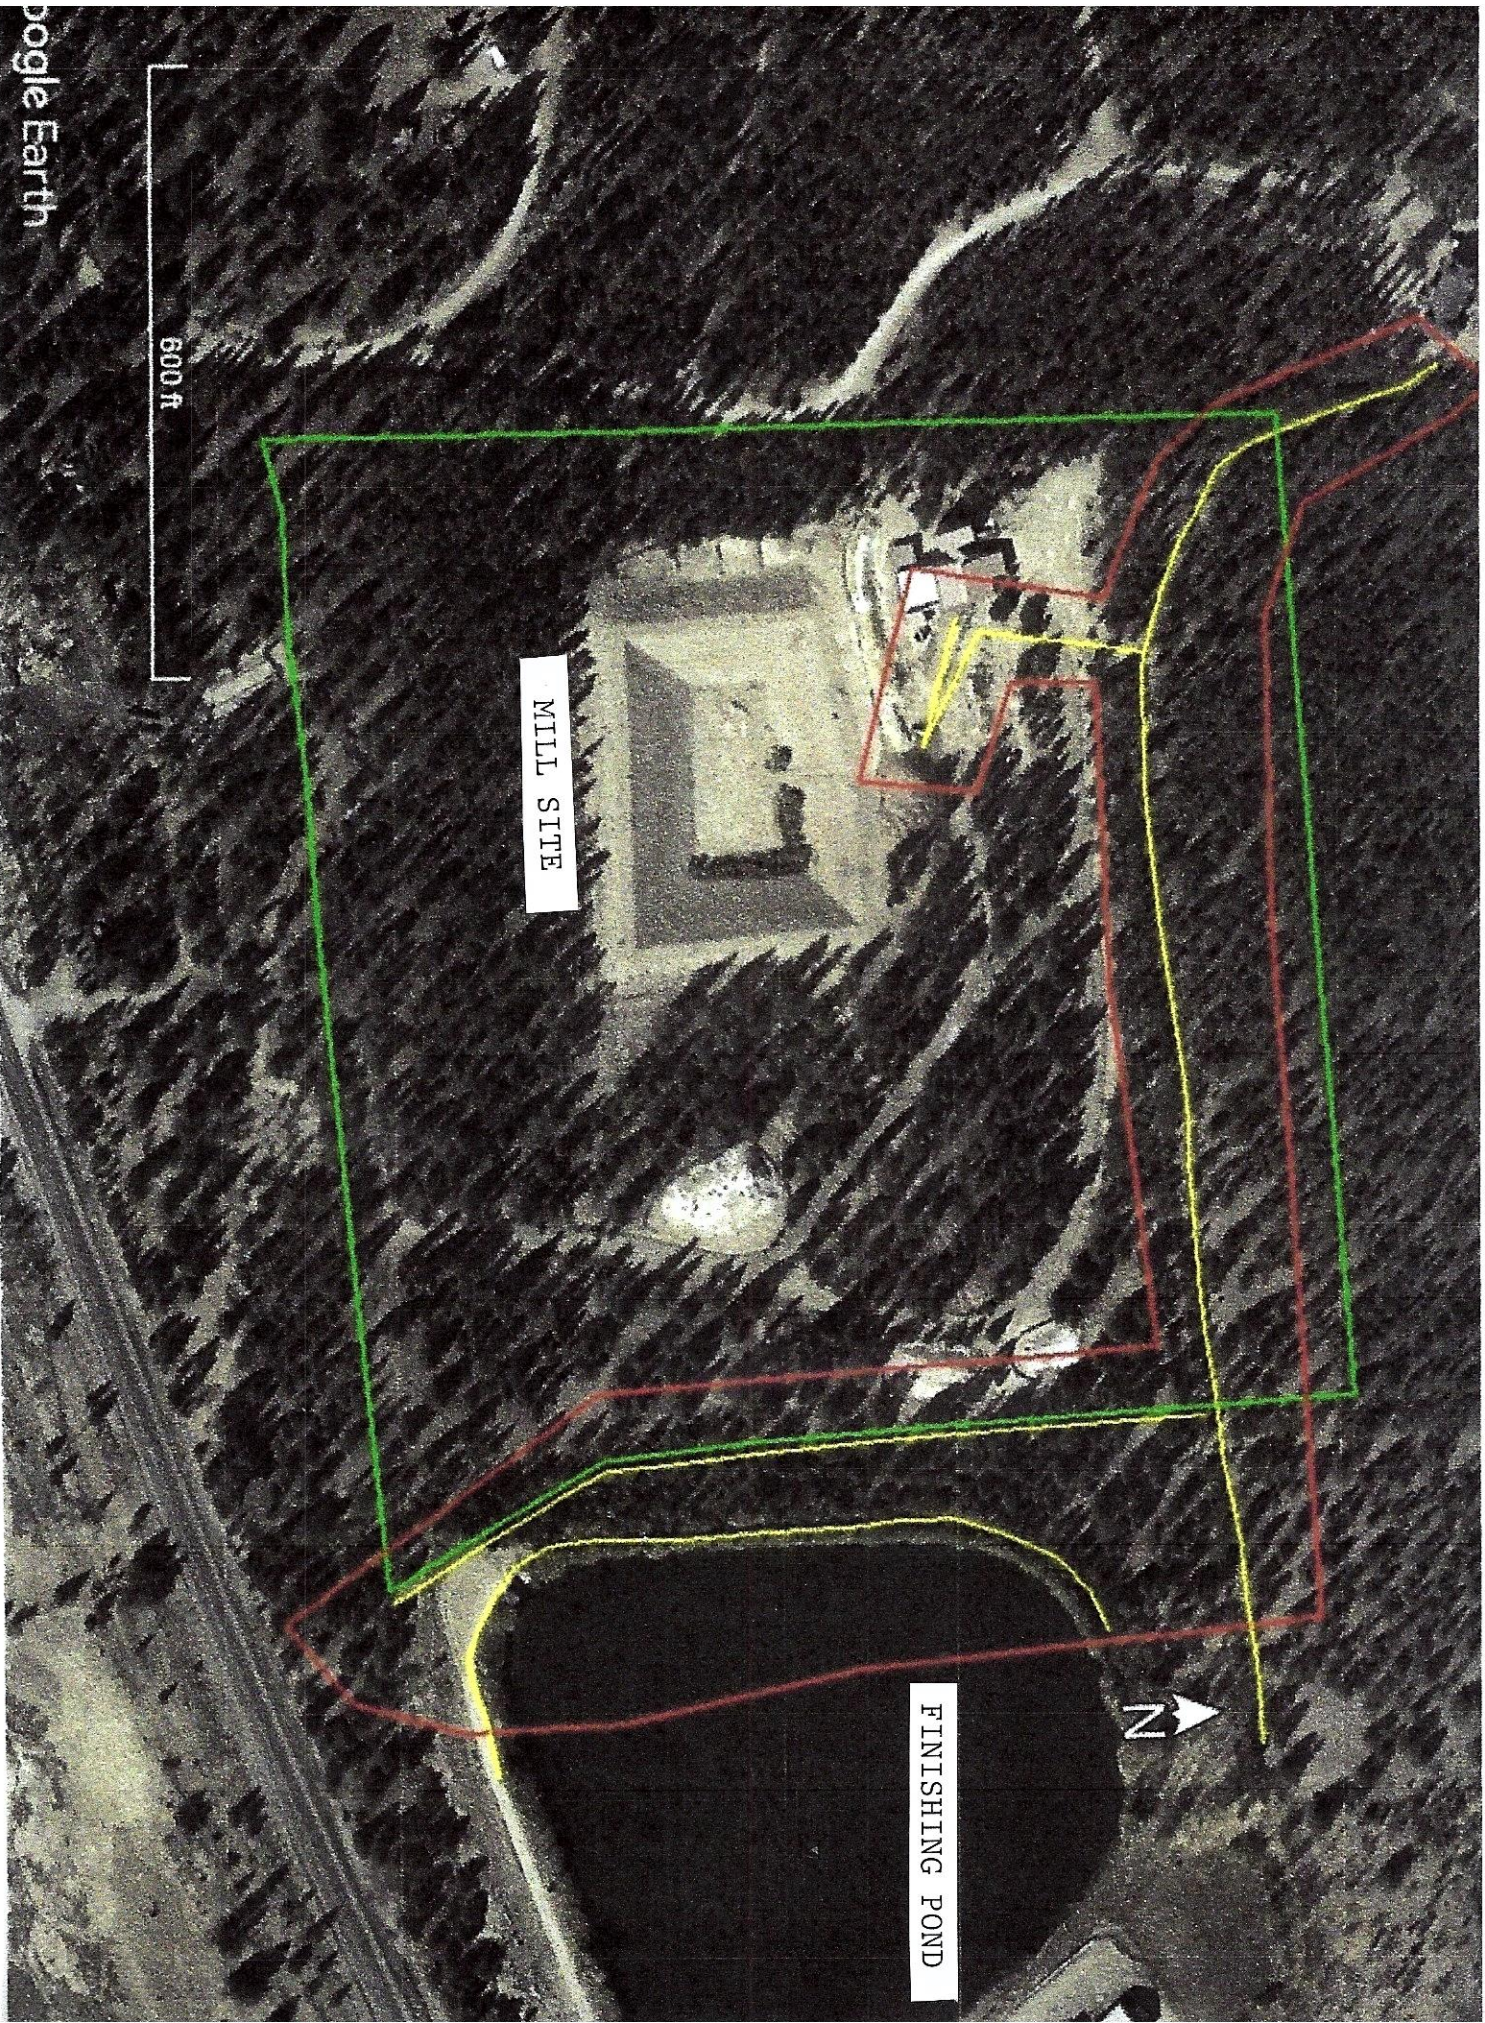

For a multitude of reasons, the Leadville Sanitation District desires to submit a meaningful objection to the application for the cyanide processing, but the district has been very recently advised that "comments" relating to the application of CJK Milling Company are required back to the state by August 25, 2021. My efforts to obtain competent legal counsel to prepare and submit an objection on behalf of the district by August 25, 2021, is posing a serious problem. I have conferred with attorneys who are willing and able to undertake the preparation of an objection, but none are able to do so by the said deadline.

Would it be possible to obtain an extension in order to prepare and submit an objection? With your response would you please advise me of the date, if any, that has been established for the hearing of the pending application. Thank you for your courtesies.

With best regards,

Joseph Fattor
