**RE: Adequacy Review No. 3; Technical Revision (TR-8); Hazeltine Mine,
Permit No. M-2004-031**

Dear Ms. Dennis,

On June 14, 2021, the Division of Reclamation, Mining and Safety (Division) received a request for Technical Revision (TR-8) to update the reclamation plan map to reflect the current infrastructure and piping of the Orr Drain construction at the Hazeltine Mine, Permit No. M-2004-031. Please be advised that on August 30, 2021, the application for TR-8 may be deemed inadequate and denied unless the following adequacy item is addressed to the Division's satisfaction. On August 17, 2021 the operator responded to the Division's Adequacy Review No. 2 dated August 16, 2021. After review of the responses the Division has an additional item that needs to be addressed. Please respond to the adequacy item with an updated map.

1. In the upper right hand corner of the map provided it states the permit area to be +/- 204 acres. Please update this statement to reflect the currently approved permit acreage of +/- 184.9 acres.

This concludes the Division's adequacy review no. 3 of your technical revision. The Division reserves the right to further supplement this document with additional adequacy items and/or details as necessary.

The decision date for your application is set for August 30, 2021. If additional time is needed to respond, an extension request must be received by our Office by the decision date. If on the decision date, outstanding adequacy items remain, and no extension request has been received, your revision may be denied.

If you need additional information or have any questions, please contact me at Division of Reclamation, Mining and Safety, 1313 Sherman Street, Room 215, Denver, CO 80203, by telephone at **303-866-3567 x8114**, or by email at patrick.lennberg@state.co.us.

Sincerely,

A handwritten signature in blue ink, appearing to read "Patrick Lennberg". The signature is stylized with a large, looped "L" and a cursive "G".
