PERMIT TO EXPOSE WATER IN A PIT

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT

CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not ensure that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
- 3) Approved pursuant to CRS 37-90-137 (2) and (11) for the operation of a well (gravel pit pond) in accordance with the temporary substitute water supply plan approved by the State Engineer on June 14, 2021, for the DPG Gravel Pit, Division of Reclamation, Mining & Safety Permit Number M-2019-028. The well (pond) shall not be operated unless it is included in a substitute water supply plan approved by the State Engineer or a plan for augmentation approved by the Water Court. The water supply plan for this pit is currently valid through April 30, 2022, and if it is not extended or if a court decree is not entered for a plan for augmentation, diversion of groundwater from this well must cease immediately.
- 4) The use of groundwater from this well, in addition to dewatering and evaporation, is limited to water lost with the mined product, dust control, concrete batching and slurry wall construction. No other use of water is allowed unless a permit therefore is approved.
- 5) The total surface area of groundwater exposed to the atmosphere at the site is limited to a maximum of 24 acres and may not exceed the total amount covered under a water court approved plan for augmentation or substitute water supply plan approved by the State Engineer.
- 6) The amount of groundwater to be appropriated shall not exceed 91.87 acre-feet under the substitute water supply plan approved by the State Engineer on June 14, 2021, consumed by evaporative loss, water lost with the mined product, dust suppression, concrete production, and slurry wall construction, or the amount covered under a subsequent water court approved plan for augmentation or substitute water supply plan approved by the State Engineer.
- 7) The owner shall mark the well (gravel pit pond) in a conspicuous place with well permit number(s) and court case number(s) as appropriate. The owner shall take necessary means and precautions to preserve these markings.
- 8) A totalizing flow meter must be installed so as to measure any pumping from this gravel pit pond and maintained in good working order. Permanent records of all diversions from the gravel pit pond, tonnage of mined product, and the surface area of groundwater exposure shall be maintained by the well owner (recorded at least monthly) and submitted to the Division Engineer upon request.
- 9) Pursuant to Rule 9.3.3 of the Water Well Construction Rules, groundwater ponds and gravel pit wells are exempt from the minimum well construction and location standards except for contamination considerations as stated in the Rule. The owner shall take necessary means and precautions to prevent contaminants from entering the groundwater pond or gravel pit well.
- 10) Pursuant to Rule 17.1.5 of the Water Well Construction Rules, the owner shall submit, after initiation of construction, site plan and cross section drawings showing the extent of intended excavation, the maximum depth of the pit or pond, the initial static water level, and the date of initial groundwater exposure to the atmosphere.

WELL PERMIT NUMBER 85654-F

RECEIPT NUMBER 10009818

- 11) The boundaries of the gravel pit pond shall be located more than 600 feet from any existing well, completed in the same aquifer, that is not owned by the applicant, excluding well permit nos. 14961-R and 118187-A (spacing waivers submitted by the well owner).
- 12) This well is subject to administration by the Division Engineer in accordance with applicable decrees, statutes, rules, and regulations.

NOTE: This permit will expire on the expiration date unless the documents required by condition of approval no. 10 are submitted to the Division of Water Resources. A one-time extension of the expiration date may be available. Contact the DWR for additional information or refer to the extension request form (GWS-64) available at: dwr.colorado.gov
