Re: **Kate2 NOI, MD2 Summary.**

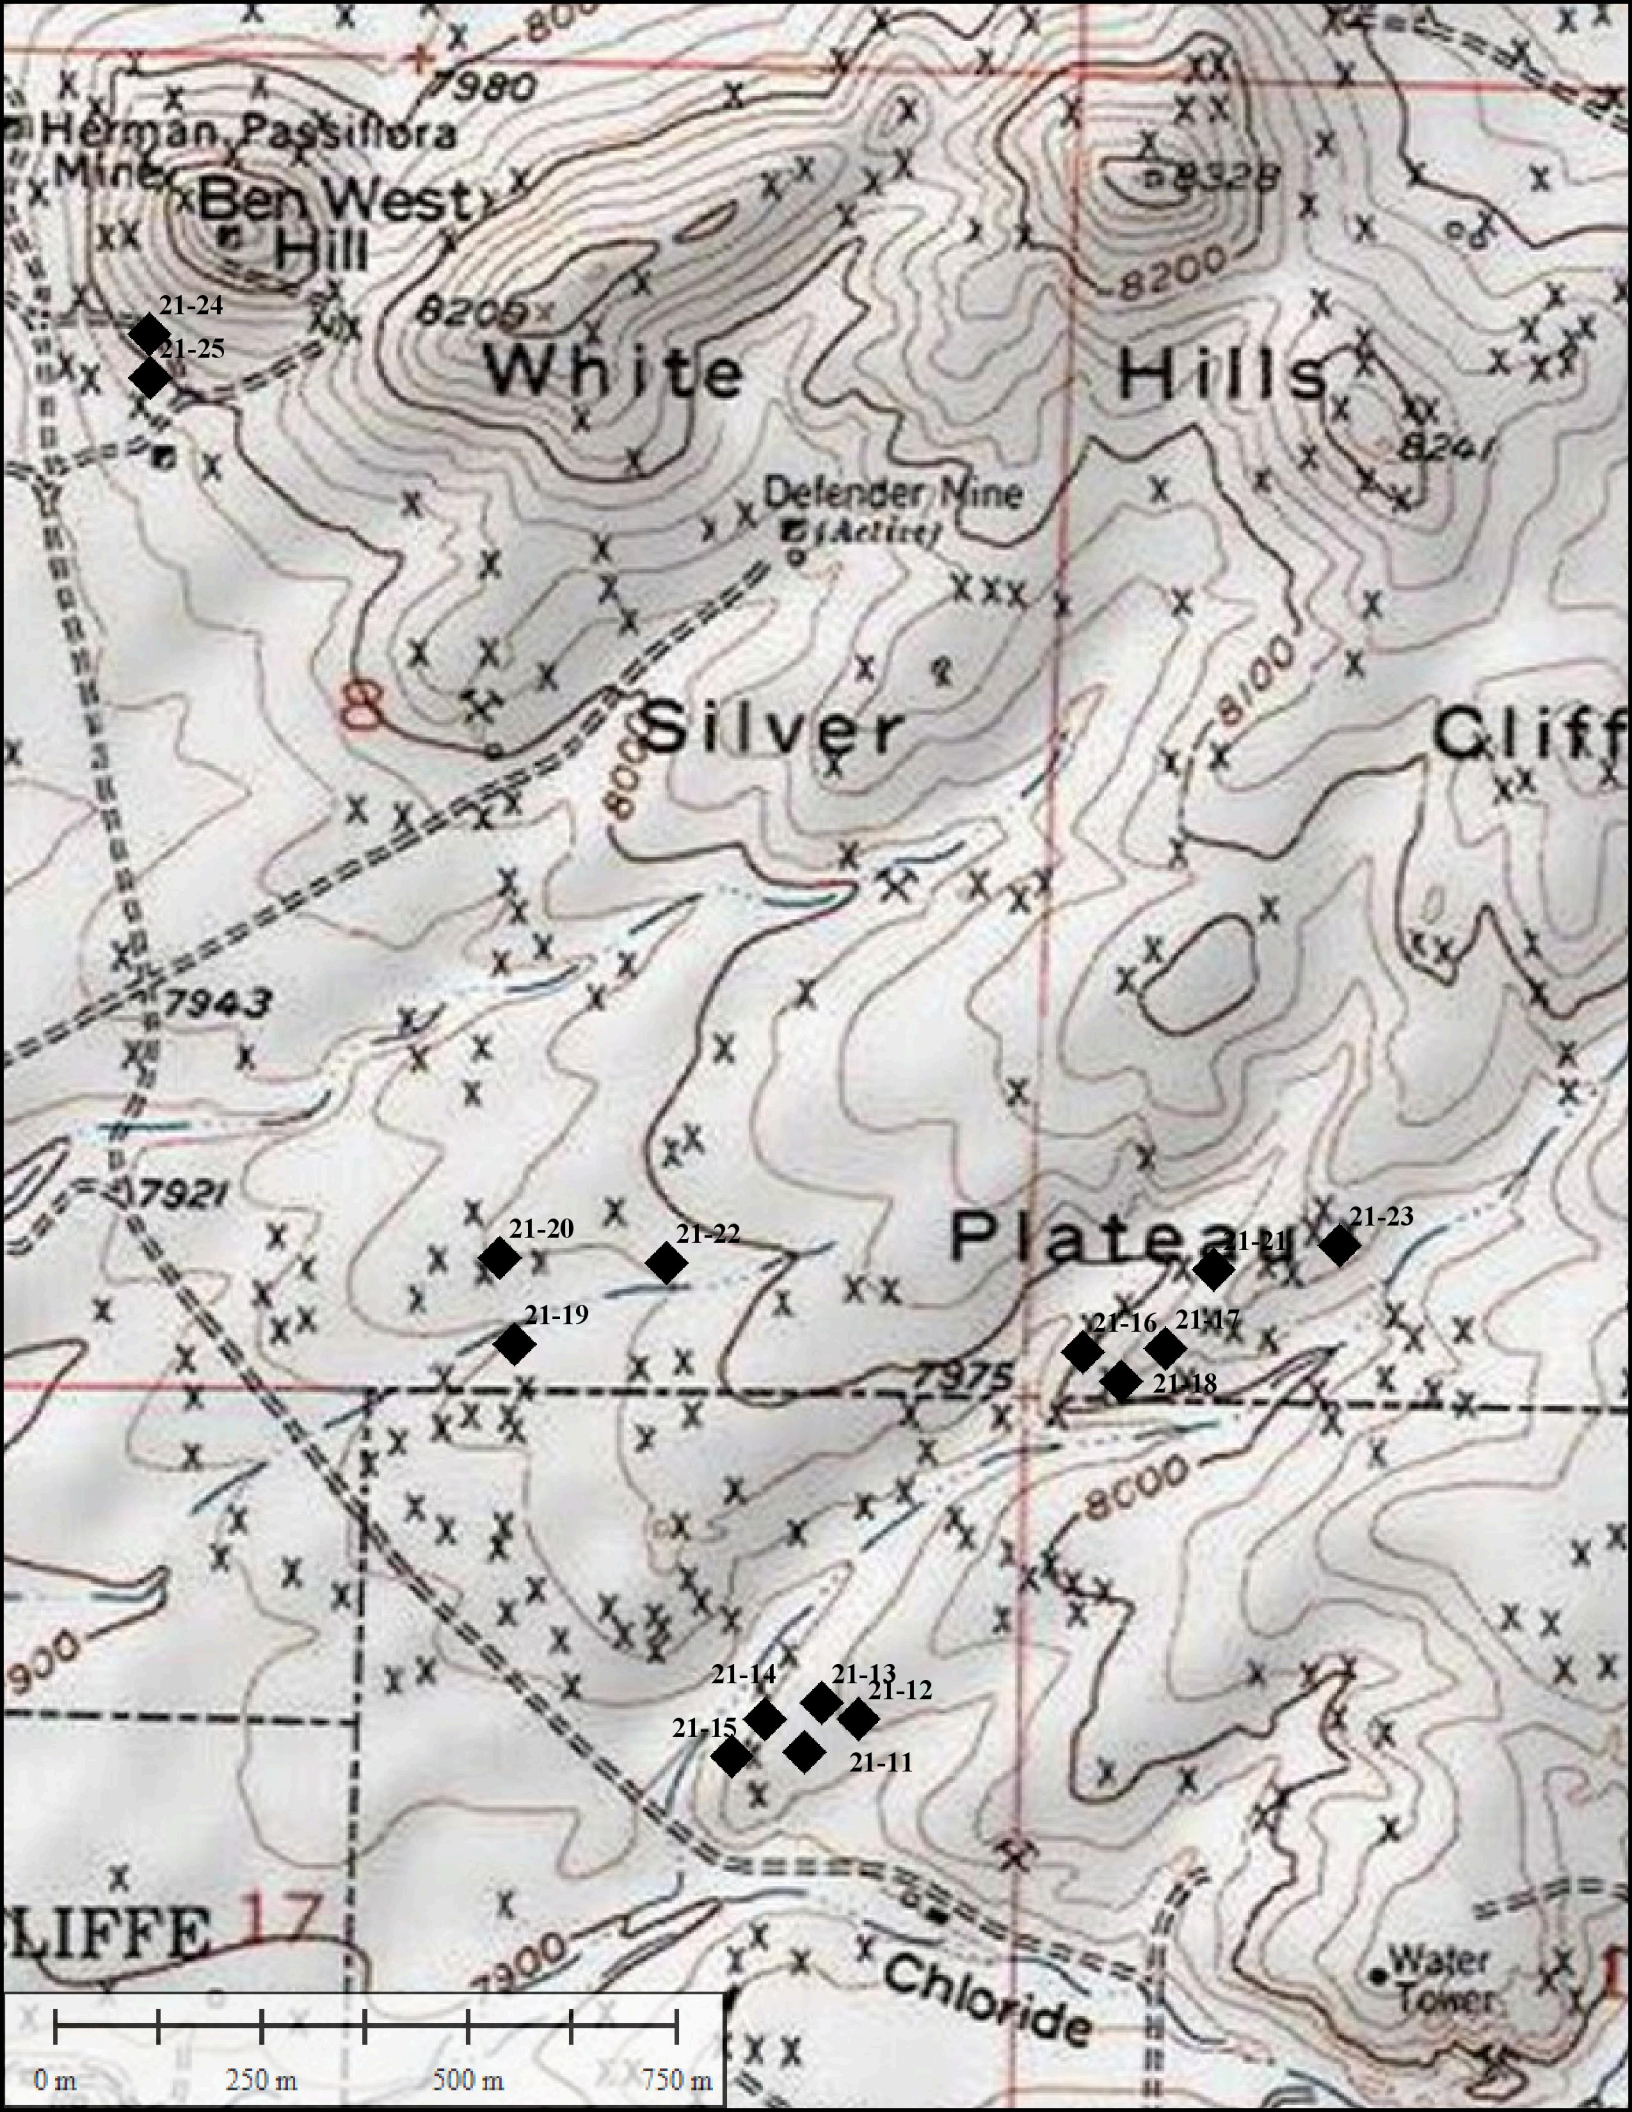

My hope is that this memo and attachments will clarify the purpose of MD2 and the associated materials.

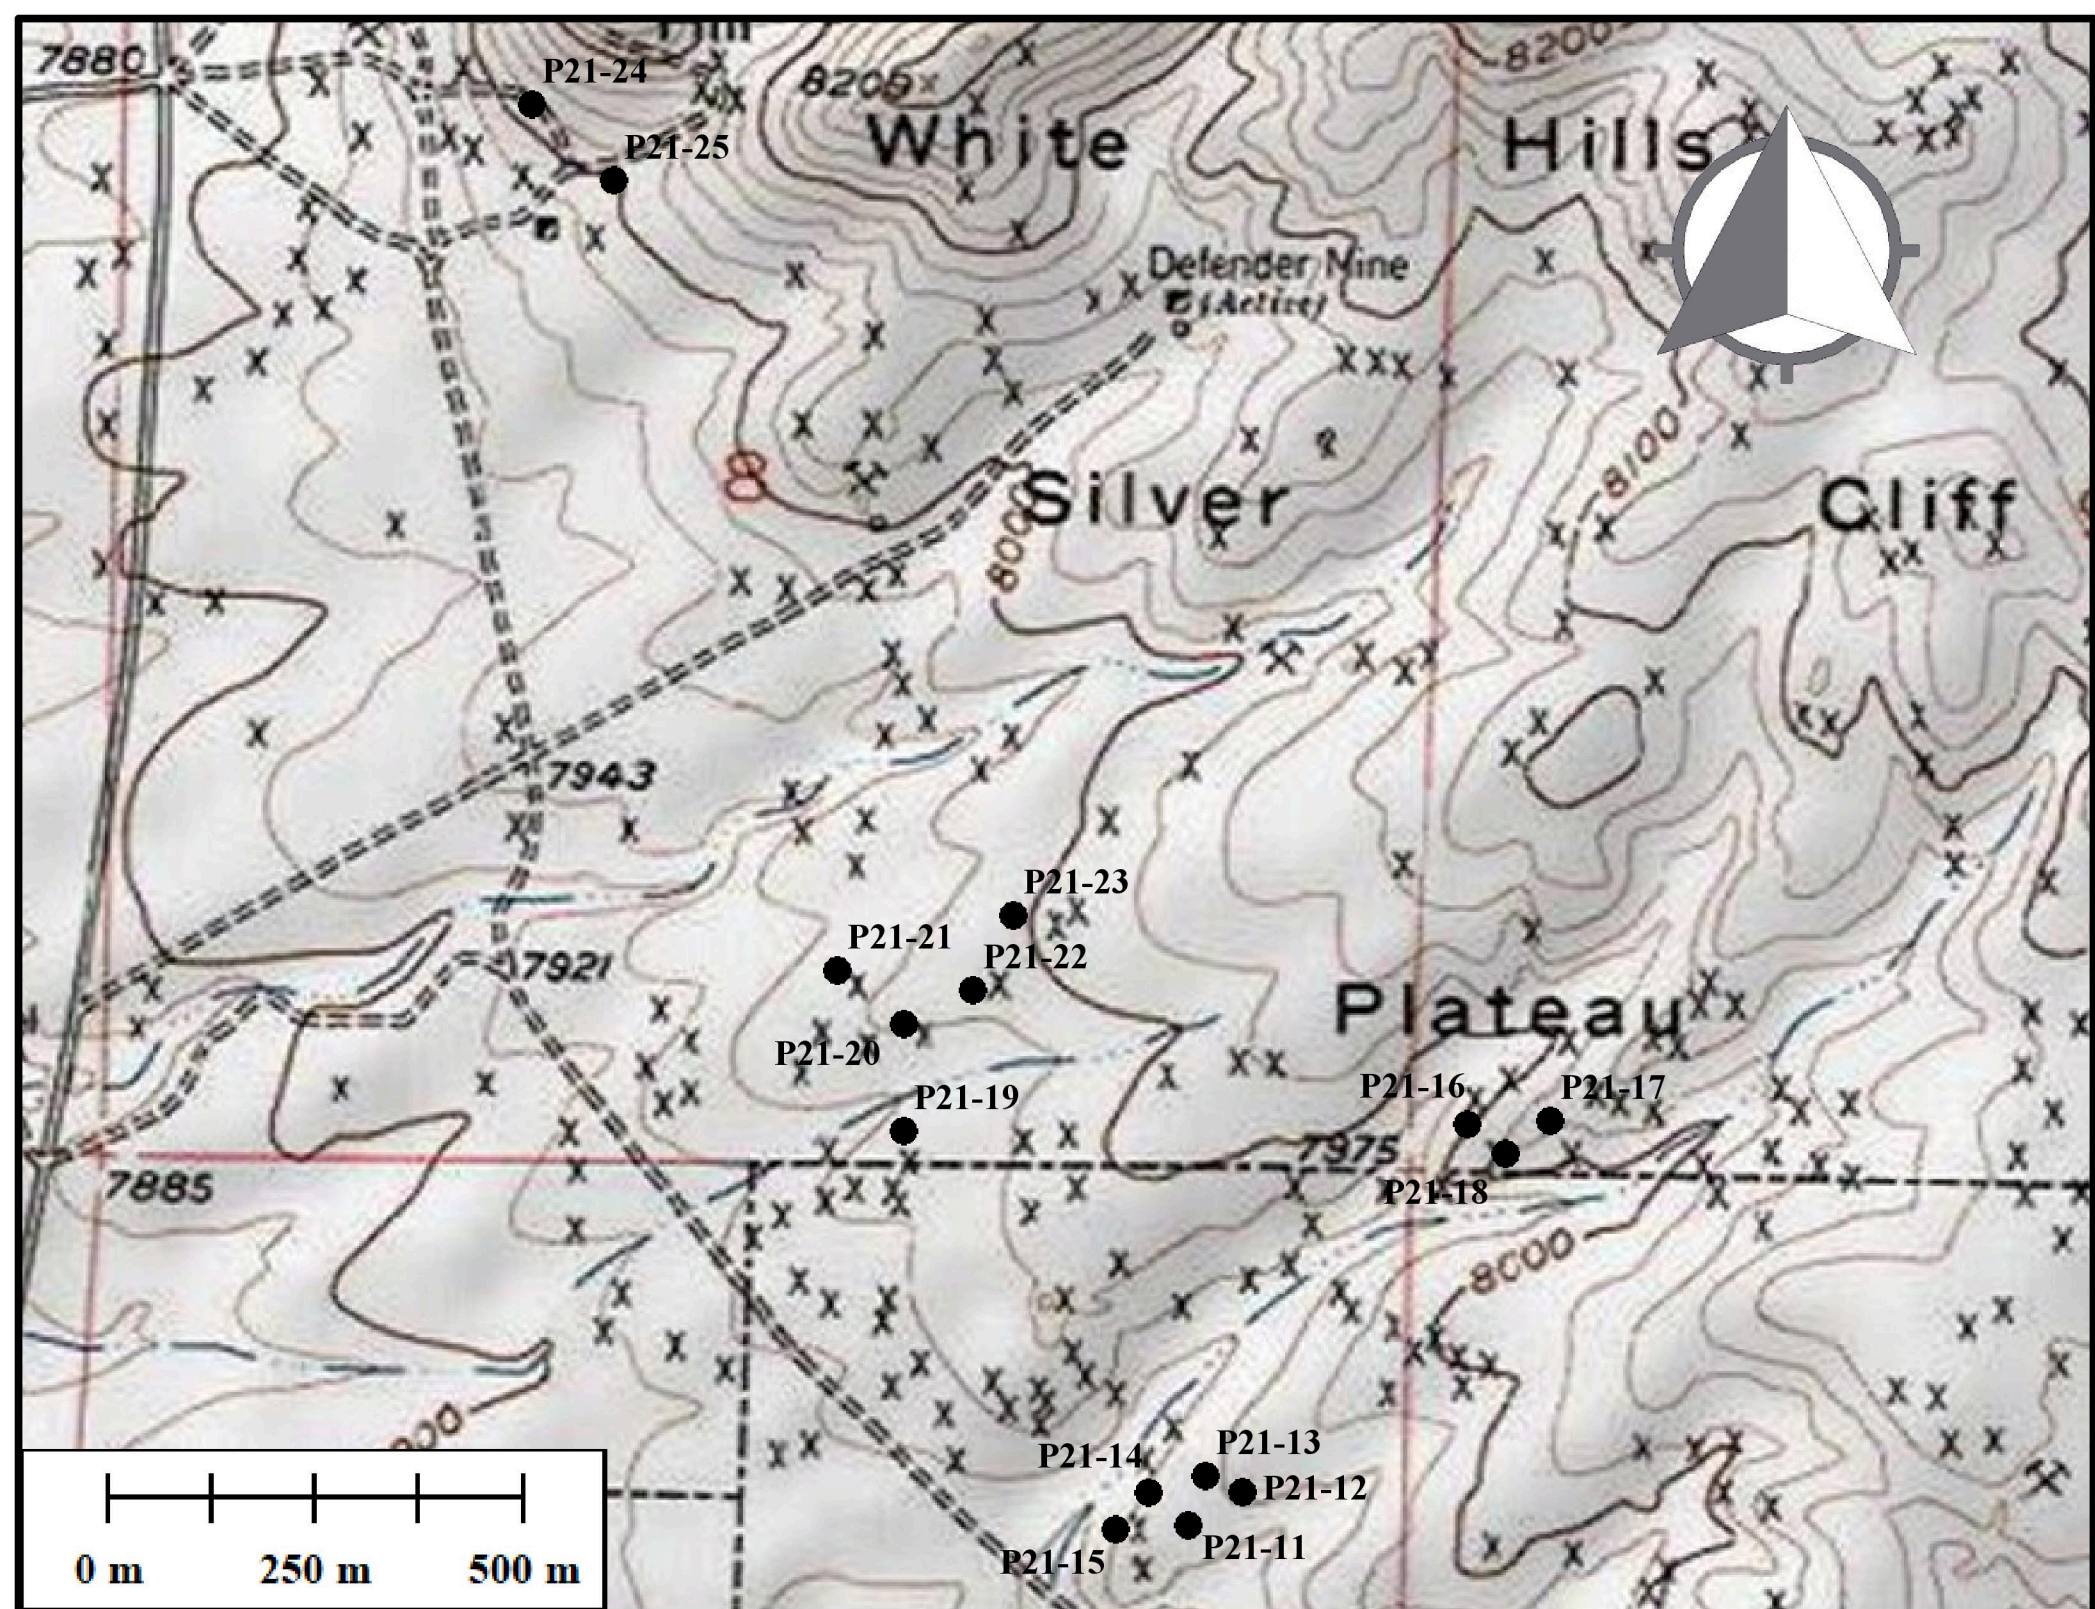

Very simply, MD2 moved the locations of borings 21-21 and 21-23. No additional borings were authorized - only the re-location of borings 21-21 and 21-23. One of the new maps provided (showing claim names) shows that these locations would be renamed to 21-27, and 21-28, however this is NOT the case. The original boring names will be retained as shown on the other maps and provided spreadsheet of GPS locations. The new locations are on private land held owned by William Tezak and an updated ROE was provided.

All the materials submitted for MD2 and attached to this memo are available for public review (as with all other Kate2 materials) per my phone conversations with Harald Hoegberg, who submitted MD2 as a representative of Viscount.
