## 2021 Moores Mining, LLC Annual Report

Mining in 2020 and 2021 has been progressing steady. The 2.5 acre area will be completed at current rate in mid to late 2022 and when complete approximately 2 acres can be seeded back to vegetation on the south side slope and the rest of the area will be used to stockpile products on until sold. It has been necessary to open up about one acre on the west end to keep up with current sales. We had about 14 acres opened up and had to open up about 1 acre more to keep the necessary benching and expect to open the rest of the approximately 2 acres of the 17.8 acres that was in the original bonded amount in late 2021 and 2022 to keep with the necessary benching to mine. A new survey and map was in the process of being completed by the surveyors office, but due to covid-19 outbreak in the surveyors office we are unable to complete at this time and a new map was created using the preliminary information that was compiled that showed acreages but not all of the reclaimed area on the south side and other small details that were not complete.

It should be noted that we are stockpiling extra sand products on the east end for large arena projects that have been on hold for covid-19. It is our hope that these projects will go on when things normalize and will not disappear with all the government controls being placed on businesses.
