

Entrance Gate → Mining ID, Permit sign
M-2000-106

Moved West a most South overburden stockpiles into old existing mined area below.

Permit Boundary Fence

Truck Backup Area

1000

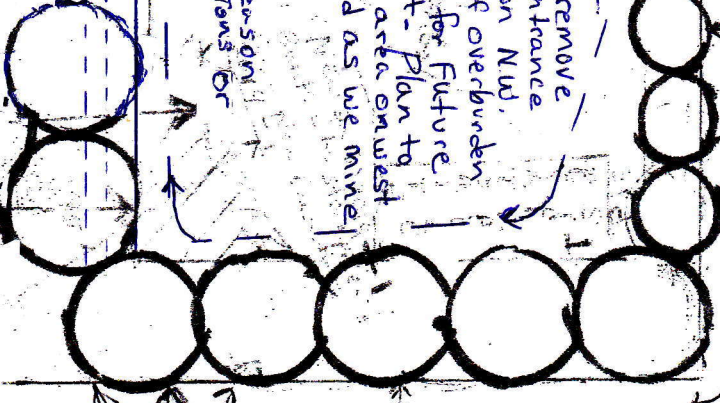

Back Into Loading Ramp

35' Setback for Future Reclamation

Plan for 2021-2022 & Beyond is to remove Back into Ramp & build Drive in Entrance down into pit & then Exit Loaded on NW Corner of pit. Also remove balance of overburden remaining on South side, Allowing for future excavation to the South and west. Plan to finish filling in old existing mined area on west side with new overburden removed as we mine further South & west.

ATTN: Activity last yr 2020-2021 season was removal of 20x150 x10 = 1111 Tons for 0.07 Ac of New Excavation

Anticipated New Excavation 2021-2022 0.07 Ac.

Setback Future Reclamation

Overburden Stock Pile

Not to Scale
