RE: August 13, 2021 Notice of Incomplete Application for Transfer and Succession of Operators Wattenberg West Sand and Gravel Mine, Permit M 2005-066

Eric Scott,

Regarding your letter dated August 13, 2021, Oldcastle SW Group, Inc. has been diligently attempting to obtain the outstanding requirements. All the requested information is ready for submittal except for new structure agreements. We anticipate the new structure agreements will take several more weeks to obtain, at which time our October 12, 2021 deadline will be surpassed. After consulting with the Division, we have decided in lieu of requesting a deadline extension, we will request a withdrawal of our Application for Transfer and Succession of Operators for Permit M-2005-066 until all the required documents can be submitted at one time.

Please consider this letter a formal withdrawal of our Application for Transfer and Succession of Operators for Permit M-2005-066.

If possible, please return all original documents enclosed with our submittal letter dated August 4, 2021 to me at the address below. This is being requested to reduce any extra burden and also any confusion that may occur regarding the internal merger and corresponding company structure changes that have occurred since the original submittal.

Please feel free to contact me if you have any have any other questions, clint.allen@na.crh.com or (515) 537-3696.

Sincerely,

Clint Allen, Sr. Environmental Manager
