Re: Oxbow Mining, LLC., Terror Creek Loadout, Permit C-1983-059
2020 Annual Hydrologic Report

Dear Mr. Simmons,

Please accept this letter as the 2020 Annual Hydrologic Report for the Oxbow Mining, LLC., Terror Creek Loadout. As the Division is aware, the facility has been dismantled and equipment removed from the site. During 2020, coal fines were removed and buried, and concrete structures were demolished and buried to prepare the area for the Post mine land use described in Permit Revision 1 as RV/Boat – Equipment Storage or other Commercial Use. The drainage ditches and ponds remain in place for sediment control.

The sediment pond and dugout pond are both inspected at least quarterly. During 2020 no water discharges occurred. No water monitoring was performed or was required at the site.

Water is no longer used at the loadout facility for dust suppression or office use. The shower facility was removed from service, demolished and removed during 2019. The site has two sources of water, which were not used during 2020. There is a domestic well which supplied water for the office and showers and water from the Deer Trail Ditch was used for dust suppression of the loadout facility. There is no record kept of consumptive use during the year.

Please call me at 970-929-6034 if you have any questions.

Sincerely,

Doug A. Smith
Chief Engineer
