Hi Peter,

Please see the attached images illustrating GRCO LLC's corrective action measures related to the Noxious Weeds at the Overlook Mine Site. Although the spray indicator dye was washed off by the rain, some residual is still visible on the thistle plant seed heads and the thistle plant is starting to yellow out and curl. GRCO LLC intends to spray again in the Spring as well.

Could you please confirm the attached images constitute sufficient evidence of corrective action?

Thank you!

Best,

Jack W. James

A photograph of a 'Spraying Record Sheet' from the 'Art of Application' company. The form is filled out with handwritten information. At the top, it says 'Spraying Record Sheet' and 'Application Date: 10-11-21'. Below that, 'Site Name: Overlook Mine' is written. The form has several sections for recording spray events, including 'Product', 'Rate', 'Volume', 'Area', and 'Operator'. The bottom of the form has a signature line and the 'Art of Application' logo.
