RE: North River Gravel Pit-Permit M1999007

Ms. Yeldell,

I am requesting that the 112c conversion application be withdrawn and our 110c permit remain. Weldon Construction as the permittee, and the landowner have decided to cease gravel operations on the property and to enter final reclamation. Once approved, we will start the reclamation process to be monitored by your office. We would anticipate, barring any bad weather, to start in November to begin reclamation. We are working with the landowner as he has a more substantial part in this process. Please advise to any special requirements you are requesting. Thank you.

Regards,

Mike T. Weldon
