Okay sounds perfect? Who should I contact in regards to research And resubmission of information and right to mine validation with the original information sent in as a comparison for what I have now to send the division of reclamation and mining.

Mr, Beck,

Please see the attached letter concerning your submitted permit to conduct coal mining activities, Division no. C-2016-090.

As the letter states, the Division has administratively terminated the application number C-2016-090 due to not receiving the information that would minimally address the requirements of a complete permit application for greater than five years.

If it is your intention to attempt to gain approval for a permit to conduct coal mining operations in the future, please contact the Division and the process may be initiated.

Please let me know if you have any questions or comments.

Thank you,

Jason Musick
