Tim,

Attached are the original documents prior to modifications for your records / review; also attached are scans of the signed & initialed pages from the copy sent to you.

Supplemental information added:

1. Added a check box for CO meridian – the rest of the PLSS descriptions are in the NOI cover letter as there was not space on the application for all the sections.
2. Added volume of material to be moved – estimated at 324 Cu.yds – this is the total for pits and drill holes combined.

Our consultant has suggested other potential revisions that we are reviewing but I shall probably wait until you send thru your questions and/or deficiencies.

Sincerely, Alan.

Thank you Alan.

The two different versions of the application present an enigma as to which is the official copy to review. Our default has been to call the hard copy the official version as the hard copy will be scanned and entered into our public document system.

What might be best is to provide me with a summary of the changes that are in the electronic format you emailed me and we can call it a supplement to the original hard copy of the application. Would that work for you?

Good afternoon,

Please see the attached "electronic filing" for the NOI mailed to you last week – there have been a couple of minor revisions to the document since I mailed it to you. Our environmental consultant for this project pointed out some deficiencies. Please let me know if I need to mail you a revised copy.

Sincerely, Alan.
