**Re: Bennett's Gravel Pit, Permit M-1979-166, Receipt of Corrective Action Documentation**

Dear Mr. Mueller:

The Division received your response to a Compliance Problem cited in the Division's report from the inspection that was conducted on August 17, 2021. The status of the corrective action in regard to the cited problem is as follows:

**Compliance Problem, Hydrologic Balance: Failure to provide evidence that a water augmentation plan or substitute water supply plan is not needed for the exposed groundwater on site.**

This problem is considered to be resolved as a result of correspondence from the Division of Water Resources (email November 23, 2021), which states that currently a well permit is sufficient and the site is in compliance with water rights regulations.

If you have any questions, please contact me at [Rob.Zuber@state.co.us](mailto:Rob.Zuber@state.co.us) or by calling (720) 601-2276.

Thank you,

Robert D. Zuber, P.E.  
Environmental Protection Specialist II
