Re: Surety-Related Inspection, M-2000-118, Pino Pit

Mr. Lennberg,

As discussed, please see the attached photos for completion of inspection items for M-2000-118 Pino Pit. Trash has been removed from the site and properly disposed. The areas of ponding water have been mitigated to prevent future water from ponding.

The Technical Revision for the weed control plan will be completed and made available soon.

Any questions, please feel free to let us know.

Best Regards,

Sara Weimer
