Tim,

Thank you for bringing the discrepancies in question to our attention surrounding our recent annual report for M1977-193, T.H.E. Aggregate Source. In an attempt to correct or explain those areas, I have listed the correct information below, along with a revised 2021 Annual Report map.

1) On question #4, you indicated the last date of activity was almost 2 years ago (11/6/2019). I'm sure you guys are operating even today. Why did you put 11/6/2019? **Reply: This was an oversight on our part in answering the question. The corrected date should read: 11/03/2021 or the date the report was filed with the Division.**

2) The map has a "pop-up" comment apparently from you that gives a square footage of 3684464 which works out to be 84.5 acres. The map says 95.5 acres of disturbance. Should I ignore the comment, or should the affected area actually be less than 95.5 acres? **Reply: The affected area, as printed on the map or 95.5 acres, is accurate. Apparently, live elements of the mapping software transferred over by mistake, hence the reason for the pop-up comment that should be disregarded. I have attached a revised map, which is a duplicate of the previous map, but with no pop-up capabilities. Please replace the current map with the revised mapping.**

Should there be any additional questions or concerns, please don't hesitate to let me know?

Best Regards,

*Randy DiLuzio**General Manager*

Hi Randy,

I just got your annual report for the Cañon site and I have two questions for you:

1) On question #4, you indicated the last date of activity was almost 2 years ago (11/6/2019). I'm sure you guys are operating even today. Why did you put 11/6/2019?

2) The map has a "pop-up" comment apparently from you that gives a square footage of 3684464 which works out to be 84.5 acres. The map says 95.5 acres of disturbance. Should I ignore the comment, or should the affected area actually be less than 95.5 acres?

Please give me a call if that's easier.

Tim Cazier, P.E.
