1.0 MINING OPERATIONS

1.1 Schist Island High Compaction Back Fill

CC&V completed the placement of the 9945' elevation high compaction backfill lift. CC&V began the placement of the 9950' elevation high compaction backfill lift. Run of Mine material was loaded from the Schist Island Pit and West/South Cresson Pit and hauled by 793 haul trucks to the high compaction backfill. A D10 dozer placed material in a 5 foot GPS controlled leading edge lift. The haulage traffic travelled over the entirety of the fill, splitting tracks with each loaded haul

truck. The D10 leveled out the windrows along the pit wall and pushed structural material into any surface irregularities along the pit wall.

CC&V shovel and loader operators monitored the Run of Mine material size being sent to the high compaction backfill. Out of specification loads containing 2 foot plus sized material were sent to the ECOSA stockpile. 2 foot plus sized material that was not removed at the dig-face by the shovel or loader operators was removed by a D10 dozer during material placement. The oversize material was stockpiled by the dozer out of the way above the current lift on the haul road against the pit high wall. A 993 loader loaded a 777 haul truck with the unsuitable material and it was then hauled to the ECOSA stockpile.

2.0 MEETINGS AND COMMUNICATIONS

NewFields personnel met with Mine Operations Supervision about the high compaction backfill progress and material quality.

NewFields personnel attended (WebEx) the weekly Schist 1 Backfill, Ridge Mining, and PSSA Construction Sync meeting on Wednesday, December 8th with representatives from Newmont Operations, Technical Services, and Environmental. Items on the agenda included a safety/value share, progress updates, reporting, void planning, Turkey Ridge mining plan, and schedule concerns.

3.0 MISCELLANEOUS, ISSUES, AND CONCERNS

- NewFields personnel completed the approval of the 9945' lift. Visual inspection and the method compaction specification were utilized to approve the lifts.
- NewFields personnel approved sections of the 9950' elevation lift. Visual inspection and the method compaction specification were utilized to approve the sections.
- Aerial progress photos were not able to be taken for the attached figures for the report week ending December 10th. High winds on December 9th and 10th grounded drone flights. A progress map provided by Newmont CC&V was utilized to create the attached figures showing high compaction backfill progress.
